1. Introduction

This guide explains how to set your Personal Identification Number (PIN) for your ATM card. Use this guide to generate a new PIN. Use this guide to reset a PIN that you forgot. Use this guide to change an existing PIN.

Your PIN protects your account. Keep your PIN secret at all times. Section 5 of this guide lists PIN security precautions.

1.1 Purpose

This guide gives clear, step-by-step instructions for retail banking customers. Each procedure includes numbered steps and an illustration of the ATM screen.

1.2 Scope

- Generating a PIN for a new ATM card.
- Resetting a forgotten PIN.
- Changing an existing PIN.
- Security precautions for your PIN.
- Troubleshooting common PIN errors.

2. Eligibility Requirements

Check the requirements in this section before you start. You must meet all requirements to set your PIN at the ATM.

Requirement	Detail
Active card	Your ATM card must be active. Contact the bank if the card is blocked.
Registered mobile number	Your mobile number must be linked to your account. The bank sends a One-Time Password (OTP) to this number.
Account status	Your account must be active and not frozen.
Card expiry	Your card must not be expired.
Identification	Bring a valid government ID if you visit a branch to set your PIN.

NOTE

If your card is new, the bank may send a temporary PIN by post or SMS. Use this temporary PIN only for your first login. Change it immediately.

3. Before You Begin

Gather the following items before you go to the ATM.

- Your ATM card.
- Your registered mobile phone, to receive the OTP.
- A private location, away from other people.

CAUTION

Do not set your PIN in a crowded area. Stand close to the ATM to block the view of your screen and keypad.

4. Procedure A — Generate a New PIN (New Card)

Use this procedure to set a PIN for a new ATM card. Complete all 5 steps in order.

Step 1: Insert Your Card

1. Insert your card into the card slot. Insert the chip end first.

Figure 1. Insert the card into the card slot.

Step 2: Select PIN Generation

2. Select the "Generate PIN" option on the main menu.
3. Select your preferred language, if prompted.

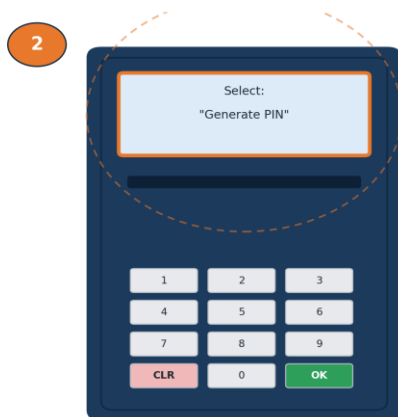

Figure 2. Select "Generate PIN" on the screen.

Step 3: Verify Your Details

4. Check the account details on the screen.
5. Confirm that the OTP sent to your mobile number matches the code you enter.
6. Enter the OTP on the keypad. Press OK.

Figure 3. Verify your account details and enter the OTP.

Step 4: Confirmation

7. Wait for the confirmation message on the screen.

Figure 4. The screen confirms that the PIN is set.

Step 5: Take Your Card

8. Take your card from the card slot.

9. Take your transaction receipt, if the ATM prints one.

Figure 5. Take your card from the card slot.

5. Procedure B — Reset or Change Your PIN

Use this procedure if you forgot your PIN or if you want to change your current PIN. Complete all 7 steps in order.

Step 1: Insert Your Card

1. Insert your card into the card slot. Insert the chip end first.

Figure 6. Insert the card into the card slot.

Step 2: Select PIN Change

2. Select the "PIN Change" option on the main menu.

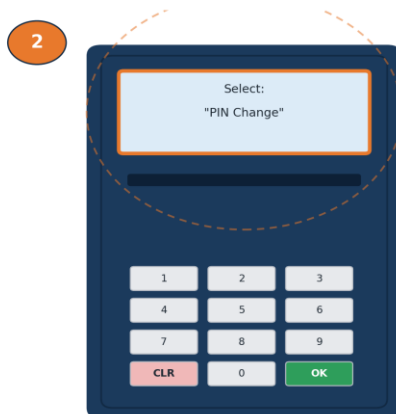

Figure 7. Select "PIN Change" on the screen.

Step 3: Enter Your Current PIN

3. Enter your current PIN. Enter the temporary PIN if this is your first PIN change.
4. Press OK.

Figure 8. Enter your current or temporary PIN.

NOTE

If you forgot your current PIN, select "Forgot PIN" on the menu. The ATM will verify your identity with an OTP instead.

Step 4: Enter a New PIN

5. Enter a new 4-digit PIN. Do not use your birth date. Do not use repeated digits, such as 1111. Do not use a sequence, such as 1234.

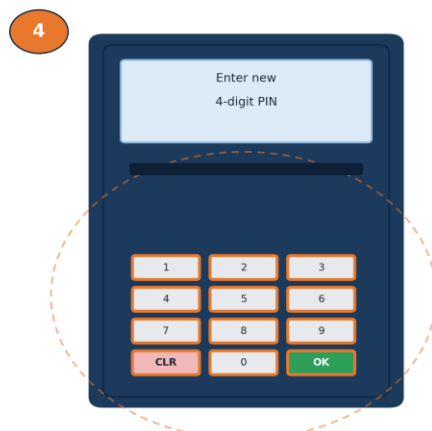

Figure 9. Enter your new 4-digit PIN.

Step 5: Confirm the New PIN

6. Re-enter the same new PIN to confirm it.
7. Press OK.

Figure 10. Re-enter the new PIN to confirm it.

Step 6: Confirmation

8. Wait for the confirmation message on the screen.

Figure 11. The screen confirms that the PIN is changed.

Step 7: Take Your Card

9. Take your card from the card slot.

10. Take your transaction receipt, if the ATM prints one.

Figure 12. Take your card from the card slot.

6. Alternate Channels

You can also set or reset your PIN through the channels in the table below. Use these channels if an ATM is not available.

Channel	How to Use It
Mobile Banking App	Log in to the app. Go to "Card Services." Select "Set/Reset PIN." Follow the on-screen instructions.
Internet Banking	Log in to your account online. Go to "Card Management." Select "PIN Reset." Verify your identity with an OTP.
Phone Banking	Call the phone banking number on the back of your card. Follow the automated instructions or speak to an agent.
Branch Visit	Visit a branch with a valid ID. Ask a representative to help you set your PIN.

7. Security Precautions

Follow these precautions to protect your PIN and your account.

Figure 13. Cover the keypad with your hand when you enter your PIN.

- Cover the keypad with your hand when you enter your PIN.
- Do not share your PIN with anyone. Bank staff will never ask for your PIN.
- Do not write your PIN on your card or keep it near your card.
- Do not use the same PIN for multiple cards or accounts.
- Change your PIN immediately if you suspect that someone knows it.
- Check your account statement regularly for transactions that you do not recognize.

WARNING

Never enter your PIN if a stranger is standing close to you or if you notice a device attached to the card slot or keypad. Cancel the transaction and report it to bank staff immediately.

8. Troubleshooting

Use this table to solve common problems.

Problem	Possible Cause	Solution
The ATM rejects the card.	The card is expired, damaged, or inserted incorrectly.	Check the expiry date. Insert the card with the chip facing up. Contact the bank if the problem continues.
The OTP does not arrive.	The mobile number is not registered or the signal is weak.	Confirm your registered mobile number with the bank. Move to an area with better signal. Request the OTP again.
The PIN is not accepted.	The PIN does not meet complexity rules.	Choose a PIN without repeated or sequential digits. Do not use your birth date.
The card is retained by the ATM.	Three incorrect PIN attempts, or a card fault.	Do not leave the ATM. Call the phone banking number on your receipt or on a nearby sign. Report the retained card immediately.
The new PIN does not work at a later date.	The PIN change did not complete, or a system delay occurred.	Wait 30 minutes and try again. Contact phone banking if the PIN still does not work.

9. Frequently Asked Questions

Q1. How many digits does my PIN have?

A. Your PIN has 4 digits.

Q2. How many times can I attempt to enter my PIN?

A. You have 3 attempts. The ATM retains your card after 3 incorrect attempts.

Q3. Can I change my PIN more than once?

A. Yes. You can change your PIN as many times as you want.

Q4. How often should I change my PIN?

A. The bank recommends that you change your PIN every 90 days.

Q5. Is my new PIN active immediately?

A. Yes. Your new PIN is active immediately after the confirmation message appears.

Q6. What should I do if I forget my new PIN?

A. Use the "Forgot PIN" option at the ATM, or use the mobile app, to reset your PIN with an OTP.

Q7. Can someone else set my PIN for me?

A. No. You must set your own PIN. Do not share your card or OTP with another person.

Q8. Does the bank charge a fee to reset my PIN?

A. No. PIN generation and PIN reset are free of charge.

10. Need More Help?

Contact the bank through any of the channels below if you need more help.

Channel	Detail
Phone Banking	Call the number on the back of your card. Available 24 hours a day, 7 days a week.
Mobile App	Open the "Help" section and select "Chat with Us."
Branch	Visit your nearest branch during business hours.
Email	Contact the bank through the secure message center in Internet Banking.

This guide is for general reference. Screens and menu names may vary slightly by ATM model and location.
